

The screenshot displays an IDE interface with the following components:

- Explorer:** Shows the project structure for `spring-learn`. The `application.properties` file is selected under the `resources` folder.
- Editor:** Displays the content of `application.properties`, showing the configuration `server.port=8081`.
- Terminal:** Shows the output of the command `mvnw.cmd spring-boot:run`. The output indicates that the application is running successfully on port 8081.
- Problems:** No errors are currently listed.
- Output:** Shows the standard output of the application, including messages about the Tomcat server and the application's startup.

The terminal output is as follows:

```

Hello World RESTful Web Service

The screenshot shows a code editor with the following Java code in `SpringLearnApplication.java`:

```
7 import org.springframework.boot.autoconfigure.SpringBootApplication;
8 import org.springframework.context.ApplicationContext;
9 import org.springframework.context.support.ClassPathXmlApplicationContext;
10
11 @SpringBootApplication
12 public class SpringLearnApplication {
13
14     Run | Debug
15     public static void main(String[] args) {
16
17         SpringApplication.run(SpringLearnApplication.class, args);
18     }
19 }
```

The terminal output shows the application running successfully:
